

GYAN PRAKASH

Lead Product Designer, Bengaluru | +91 8468830568 | mgyan1996@gmail.com | www.gyan.design

PROFESSIONAL SUMMARY

Lead Product Designer with 7+ years of experience architecting scalable UX systems for complex, data-heavy enterprise platforms. At HPE, leading the UX strategy to unify legacy networking ecosystems into a single support portal, with a consistent track record of measurable outcomes across design systems, research, and AI-augmented workflows.

PROFESSIONAL EXPERIENCES

1. Hewlett Packard Enterprise

Lead Product Designer

Bengaluru | May 2026 - **Present**

- **Complex Systems & Flow Unification:** Leading UX architecture to merge two networking platforms, Juniper Networks and Aruba Networks, into the unified NSP portal, bringing together separate post-acquisition user journeys into one, reducing tool-switching for IT admins managing both networking ecosystems.
- **Design System Rollout:** Rolling out the enterprise design system across NSP and turning new UI components into a standardized, reusable library, cutting design-to-development handoff time by ~25% and reducing UI inconsistencies.
- **AI-Augmented Prototyping:** Introduced AI-assisted prototyping with Figma Make into daily workflows to generate pixel-perfect UI outputs and run usability tests before development begins, cutting development rework and post-development UI anomalies by ~20% while speeding up iteration cycles.
- **Research & Validation Process:** Shifted the team from a reactive process, where feature gaps surfaced only after customer pushback post-launch, to a proactive validation pipeline using usability testing, concept testing, and A/B testing before release, ensuring the right features ship the first time and improving customer satisfaction and NPS.

2. Fasal.co, IoT, SaaS

Senior Product Designer

Bengaluru | Aug 2022 - May 2026

- **Product & UX Strategy:** Led end to end user experience strategy for enterprise IoT monitoring platforms, achieving 15% growth in Daily Active Users (DAU) and a 10% increase in premium feature adoption.
- **Data Visualization & UI:** Redesigned the core Sensor Dashboard to make telemetry data (humidity, soil moisture) readable for non technical farmers. Reduced decision making time by 40%.
- **Design Systems & Scalability:** Architected a scalable Atomic Design System supporting 3 software verticals. Standardized UI components (Atoms to Organisms) across Web and Mobile, reducing design to development handoff time by 35% and cutting release time by 2 weeks per cycle.
- **Operational Efficiency & AI Workflows:** Optimized design operations by introducing AI augmented prototyping workflows (Cursor/Claude) for rapid frontend code validation, cutting iteration cycles by 50%. Mentored 3 junior designers on data driven design and AI literacy.

3. BazaarNXT | B2B Supply Chain & Logistics Platform

Product Designer

Bengaluru | March 2021 – July 2022

- **End to End Product Execution:** Designed and launched the BazaarNXT mobile app (Android/iOS) and internal merchandising & pricing tools for BDEs. 10,000+ users onboarded within the first 3 months.
- **System Design & Efficiency:** Revamped three core web platforms (ProcureNXT, SellerNXT, PackNXT) under a Unified UI/UX Design Language, cutting frontend development time by 50%.
- **User Retention Strategy:** Redesigned key customer touchpoints based on behavioral analytics, achieving a 30% increase in retention rate and a 50% decrease in bounce rate across the e-commerce funnel.
- **Strategic Impact:** Designed high fidelity, investor facing product visions that helped secure Series A/Bridge funding by demonstrating product market fit.

4. Ucertify, Ed tech

Product Specialist

Noida | Feb 2020 – Feb 2021

- **User Research:** Conducted 50+ product demonstrations and client interviews, translating feedback into UX product recommendations that measurably improved user satisfaction.
- **Cross functional Collaboration:** Worked with international engineering teams to refine product positioning, directly supporting revenue growth through upselling initiatives.

SKILLS

- **Core Competencies:** Enterprise Product Design, User Interface Design (UI), Data Visualization, Complex System Design, IoT Experience (IoT), Information Architecture (IA), Service Design, Usability Testing, A/B Testing.
- **Design Leadership:** Design Systems (Scalability), Product Strategy, Agile/Scrum Methodology, Technical Feasibility Assessment, Cross functional Collaboration, ROI Driven Design.
- **Tools:** Figma (Variables & Auto layout), Cursor, Claude, JIRA, Miro, Useberry, Notion, Zeplin.

EDUCATION

- Interaction Design Foundation (TOP 10%) 2020-2021
- B.Tech (AE) – Lovely Professional University 2016-2020
